

# BIJ2 Consulting

Evidence Systems • Domain Intelligence • AI

For mission-critical decisions

## CAPABILITY STATEMENT

UEI: PD6TA4YL1543

CAGE: 0ESQ1

DUNS: 134511171

STATUS: WOSB

BIJ2 Consulting is a woman-owned small business that helps governments, regulated organizations, and research-intensive teams turn domain expertise, rigorous methods, and modern technology into decision-ready intelligence. We design stronger evaluations, modernize data systems, and apply AI with methodological discipline in high-stakes environments.

**Built for both government delivery and AI-enabled analytical work.** BIJ2 brings together evaluation science, econometrics, data engineering, technical quality review, and domain-informed AI support.

## SIGNATURE SOLUTIONS

<b>BIJ2 Evidence Quality Index Suite™</b> Structured reviews for evaluation designs, reports, survey instruments, and evidence readiness in high-stakes settings.	<b>Evaluation, Research &amp; Causal Inference</b> End-to-end support for study design, quasi-experimental analysis, survey work, interpretation, and final reporting.	<b>Domain Intelligence &amp; AI Support</b> Domain-informed QA, research synthesis, responsible AI workflows, and technical support for advanced analytical teams.
--	---	---

## CORE CAPABILITY AREAS

### Research, Evaluation & Evidence Design

- Impact evaluation, learning agendas, implementation studies, and measurement frameworks
- RCTs, quasi-experimental designs, and evidence readiness support

### Econometrics, Analytics & Forecasting

- Causal inference, econometric modeling, predictive analytics, and cost-benefit analysis
- Scenario analysis, geospatial analytics, and performance measurement

### Data Platforms & Decision Infrastructure

- Data engineering, ETL workflows, metadata systems, governance, and documentation
- Dashboards, reporting workflows, and decision-ready information architecture

### AI, Technical QA & Domain Intelligence

- Responsible AI workflows, analytical automation, and structured research synthesis
- Technical review, quality assurance, and domain-informed support for high-stakes use cases

## MARKET ALIGNMENT

### Government & Public Programs

Policy evaluation, performance systems, evidence support, modernization, and delivery analytics.

### AI Labs & Research-Intensive Teams

Domain intelligence, technical QA, structured synthesis, and responsible AI workflow support.

### Regulated Sectors

Health, education, finance, energy, agriculture, labor, and mission-driven organizations.

## WHY BIJ2

- **Research-grade rigor**  
Economics, evaluation science, data practice, and methodological discipline.
- **Domain expertise + tech intelligence**  
Connects sector context with analytical execution and AI-enabled workflows.
- **Small-business agility**  
Flexible partner model for prime or specialist support with clear, disciplined delivery.
